m u s i c
one step at a time

Music practice can be unfocused, filled with self-doubt, lonely, and disconnected from your goals and dreams.

half step helps you climb higher by providing bite-sized tasks, near-peer support, and progress tracking.

tasks

reworded to focus on learning

old

simple

complete current lesson

medium

add new music learning goal

complex

find someone on the same step
to meet and learn with

new

simple

learn next “skill bite”

medium

add new music learning goal

complex

find someone learning the
same thing as you to be
inspired by

revised interface design

3 biggest changes

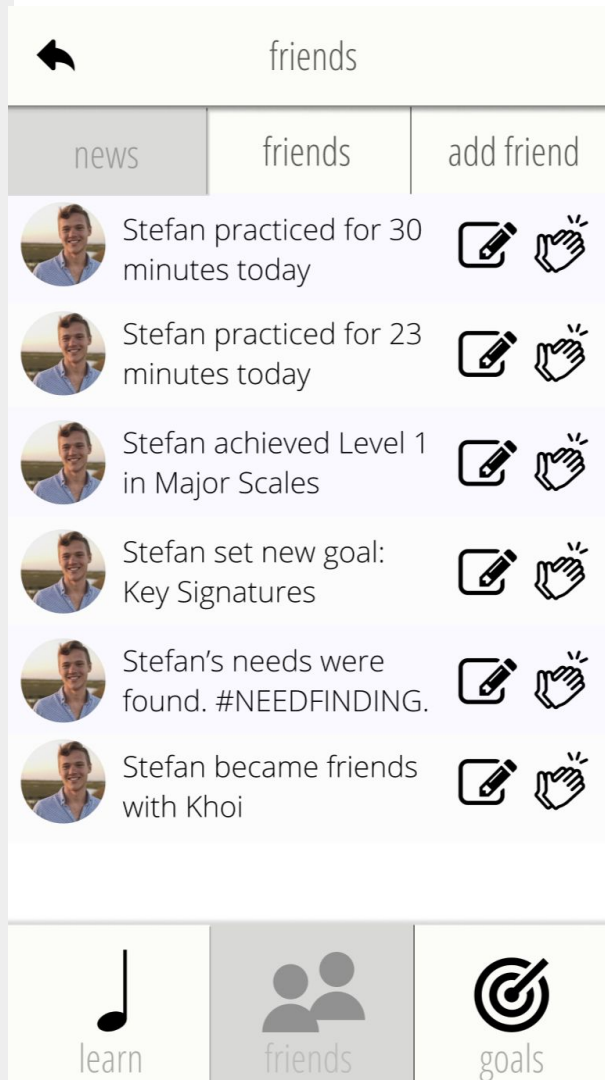

**change 1:
redefine &
design
social
support**

- adding friend
unintuitive
- interfears with
practice

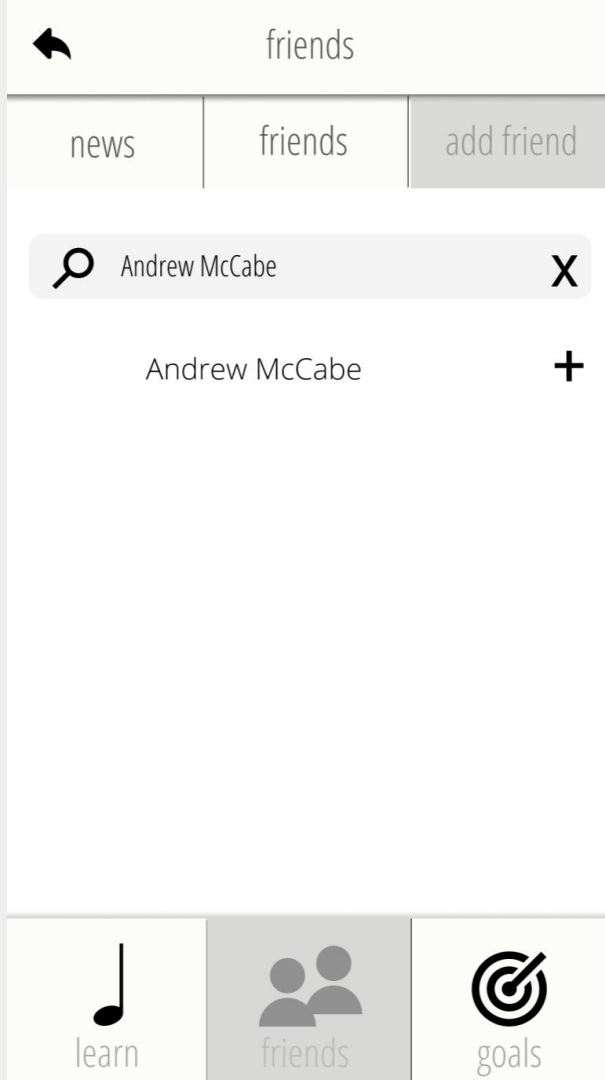

redesigns:

- tab view
- get inspired via “news”
- clearer adding interface

redesigns:

- tab view
- get inspired via “news”
- clearer adding interface

new

**change 2:
redesign
goal
setting &
finishing**

issues:

- progression unclear
- difficult to assess what goals entail

old

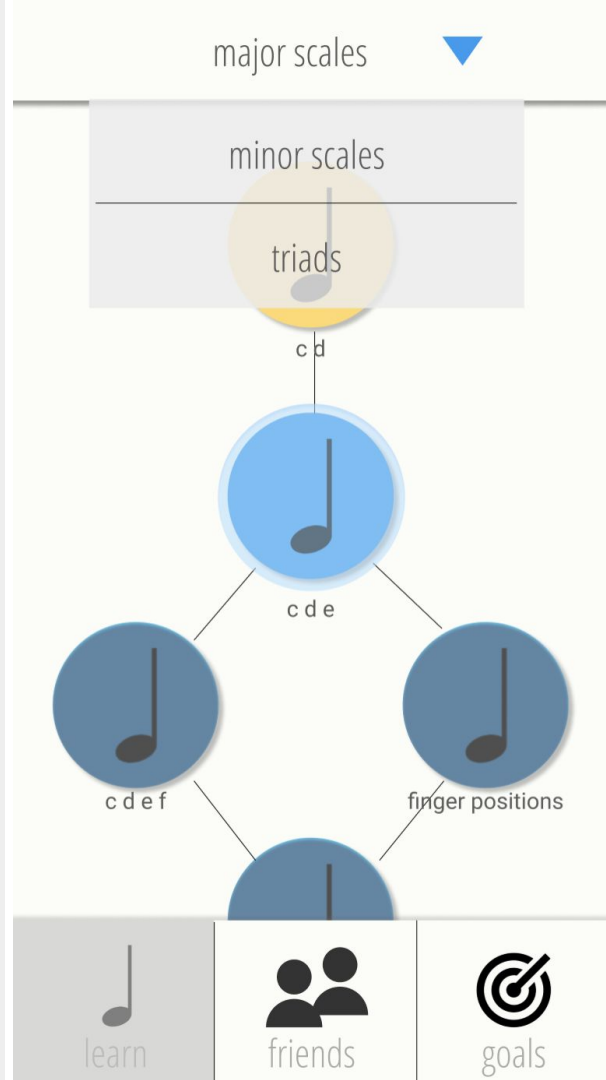

redesigns:

- color indicates status
- info popup
- progress arc

redesigns:

- goal dropdown

change 3:
clarify,
unify,
fun-ify
lessons

issues:

- progression unclear
- difficult to assess what goals entail

redesigns:

- consistent circle paradigm
- “delightful” completion
- animation
- indicative colors

redesigns:

- consistent circle paradigm
- “delightful” completion
- animation
- indicative colors

goals

These are your goals! Yellow ones are ones you are making progress on, and your progress is shown in the ring around the center number, which represents your level for that skill. Blue ones are ones you have yet to start. Select one to learn more about it, then start it. Gray ones are not available yet.

CODE

PROTOTYPE BACKGROUND

#000000

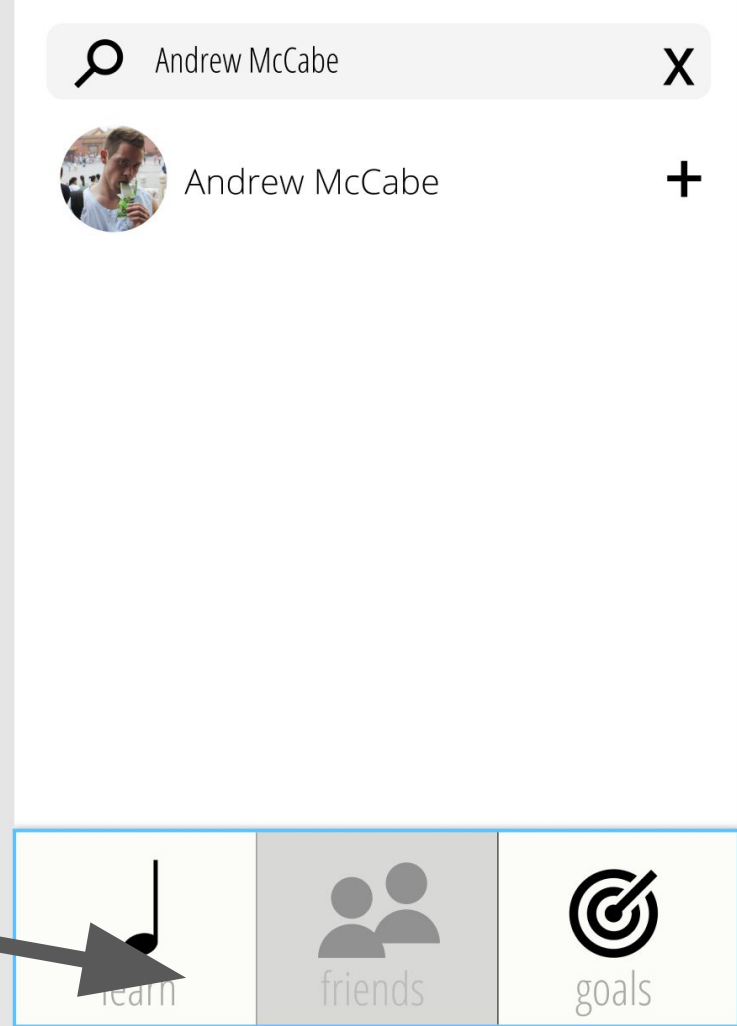

To delete a connection click and drag on either end.

Use the play button in the top bar to play your prototype. If there are no connections, the play button can be used to play a presentation of all your frames.

re-usable components

limitations

- unable to test “delightfulness” of interactions
- hard coded, can’t adapt to skill level
- can’t test follow through over time
